Projects

Weather Report | HTML, CSS, JavaScript, API

Feb 2024 - Apr 2024

- Built a responsive web app displaying current weather based on user's location.
- Used OpenWeatherMap API to fetch temperature, humidity, wind speed, and condition.
- Handled API errors gracefully and used CSS to enhance user experience.

Placement Portal | React.js, Firebase, Tailwind CSS

July 2024 – Oct 2024

- Developed a web-based platform where students can log in using unique credentials to apply for jobs.
- Dashboard provides job listings with details and application options.
- Implemented Resume Generation from user inputs with three template selections.
- Firebase used for authentication and hosting; Firestore used for storing user/job data.

ElderNest | React.js, Firebase, Tailwind CSS

Dec 2024 - Feb 2025

- $-\,$ Developed a platform for elderly users with login, posting, and community interaction.
- Added a Friends Page with like/skip features for social engagement.
- Included Info Page with emergency, healthcare, and personal contacts.
- Used Firebase for backend, React.js for frontend, and Tailwind CSS for styling.

Certifications

Infosys Springboard: Data Structures and Algorithms in Java

PayPal: Robotics Process Automation

Leadership & Extracurriculars

Participated in a 24-hour college-level Hackathon and built a basic prototype.

Took the lead in organizing a successful BGMI gaming event at college.
